 [Project-Game](#)

Passionate and self-driven game developer currently pursuing a degree in Game Technology at Electronic Engineering Polytechnic Institute of Surabaya (PENS). Eager to bring creativity and technical expertise in Unity and C# to innovative game projects. Experienced in team-based development through Garena Game Jam and campus projects. Currently developing a 3D Tower Defense game with realistic visuals to deliver a fresh and immersive gameplay experience for strategy game enthusiasts.

Experience

Game Programmer - Game Jam Participant 2025

- Collaborated with a small team to design, develop, and deliver a fully functional game within 72 hours
- Took responsibility for implementing core gameplay mechanics using Unity and C#
- Applied Unity Timeline for in-game cinematic sequences
- Gained hands-on experience in rapid prototyping and agile teamwork under tight deadlines

Game Programmer (Student Role) 2023 - present

- Worked on various academic and independent game development projects using Unity and C#
- Built 2D and 3D gameplay systems, UI, and interactive mechanics based on project requirements
- Collaborated with fellow students in multidisciplinary teams (design, art, and audio)
- optimizing game performance and debugging gameplay issues & Playtesting the finished game to the general public
